I am currently a third-year student at TARUMT, pursuing a Bachelor's degree in Software Engineering. I am knowledgeable in the software development life cycle, with a particular focus on mobile application development and web design. One of my most notable projects involved storyboarding and prototyping a resume builder app, which honed my skills in both creativity and technical execution. As I am presently in my semester, I am actively seeking short-term job opportunities from August 2026 to November 2026. I aim to enhance my portfolio with more diverse and valuable work experience.
