1 Product Backlog

A prioritised list of all user stories (at least 5 per team member). Each story must follow INVEST. Add rows as needed.

ID	User Story (As a... I want... so that...)	Priority	Story Pts	Owner
US-01	As a job seeker, I want to be able to register for a new account so that I can apply for jobs and manage my details	Must	5	Chan Jing Xing
US-03	As an employer, I want to be able to register for a new company account, so that I can post job listings.	Must	5	Ng Jing Xuan
US-05	As a user, I want to be able to log in to the website, so that I can access the website with my personalised features.	Must	3	Yap Wing Hong
US-06	As a user, I want to be able to log out from the website, so that my account details are protected when I exit the website.	Must	1	Yap Wing Hong
US-02	As a job seeker, I want to be able to make changes to my profile details, so that I can update my resume.	Must	3	Chan Jing Xing
US-08	As an employer, I want to be able to post job listings with descriptions and requirements, so that job seekers can find and apply for the job.	Must	5	Yap Wing Hong
US-12	As a job seeker, I want to view the full details of a job listing, so that I can decide whether to apply.	Must	2	Ng Jing Xuan
US-18	As a job seeker, I want to be able to search for jobs by entering the job title and company name, so that I can find relevant jobs easily.	Must	5	Ng Jing Xuan
US-13	As a job seeker, I want to be able to apply for a particular job with my saved resume, so that I can apply for jobs easily without resubmitting every time.	Must	5	Yap Wing Hong
US-16	As an employer, I want to view job applicant details for a particular job, so that I can make decisions on who to hire.	Must	3	Chan Jing Xing
US-17	As an employer, I want to be able to accept or reject a candidate for a job posting, so that I can inform applicants of my decision.	Must	3	Chan Jing Xing
US-14	As a job seeker, I want to be able to see	Must	3	Ng Jing

	my application status, so that I know whether I have been accepted for the job or not.			Xuan
US-04	As an employer, I want to be able to make changes to the company profile details, so that my profile displays up-to-date information about the company.	Should	3	Chan Jing Xing
US-07	As a user, I want to be able to reset my password if I forget it, so that I can regain access to my account.	Should	3	Ng Jing Xuan
US-09	As an employer, I want to be able to edit a particular job's details, so that I can make changes to the job listing after posting them.	Should	5	Chan Jing Xing
US-10	As an employer, I want to be able to view all my posted job listings, so that I can keep track of them easily.	Should	2	Yap Wing Hong
US-11	As an employer, I want to be able to close a job listing, so that job seekers know that the job position has been filled.	Should	1	Yap Wing Hong
US-19	As a job seeker, I want to be able to use search filters when searching for job listings based on job category, location, job type, company, salary range, and work arrangement, so that I can narrow down the job listings that fit my needs.	Should	8	Ng Jing Xuan
US-15	As a job seeker I want to receive notifications when my application status is updated, so that I know if I am accepted or not for the job.	Could	5	Yap Wing Hong

Prioritisation method

The product backlog was prioritised using the **MoSCoW** prioritisation method, which classifies user stories into **Must Have**, **Should Have**, **Could Have**, and **Won't Have** priority levels according to their business value and project objectives. User stories that provide the core functionality of the Job Portal Website, such as account registration, login, job posting, job searching, and job application, were categorised as Must Have because the system cannot operate without them.

Features that improve usability but are not essential, such as password reset, editing job listings, and search filters, were categorised as Should Have.

Optional features that enhance user experience, such as application status notifications, were classified as Could Have.

In addition to business value, dependencies between user stories were considered to ensure prerequisite features were completed before dependent features, allowing the development team to deliver a functional product incrementally across the sprints.

Sprint 1

1.1 Sprint Goal

State one clear, measurable goal for this sprint.

Sprint Goal: By the end of this sprint, users should be able to register an account, log in, and log out as either a job seeker or employer on the job portal website.

1.2 Sprint Backlog

Selected user stories broken into tasks, with story points and status.

Story ID	Task breakdown	Assignee	Pts	Status
US-01	Design and create job seeker registration page	Chan Jing Xing	5	Done
	Create job seeker registration backend (Input fields, adding new record to database, redirect to login page)			Done
	Create validation checks for user input (Success and error messages)			Done
US-03	Design and create employer registration page	Ng Jing Xuan	5	Done
	Create employer registration backend (Input fields, adding new record to database, redirect to login page)			Done
	Create validation checks for company information input (Success and error messages)			Done
US-05	Design and create user login page	Yap Wing Hong	3	Done
	Create login page backend (Authenticate credentials, redirect by account type)			Done
US-06	Create logout functionality (End current session, redirect to home page)	Yap Wing Hong	1	Done

1.3 Story Acceptance Tests

Add one block per user story undertaken in this sprint. Duplicate as needed.

User Story ID	US-01
Acceptance Criteria	Successful job seeker registration
Scenario (Given)	Given I am on the Job Seeker Registration page
Action (When)	When I enter a valid username, email address, password and confirm password And I click the Register button
Expected (Then)	Then a new job seeker account is successfully created And a success message is displayed And I am redirected to the Login page.
Result (Pass/Fail)	Pass

User Story ID	US-01
Acceptance Criteria	Duplicate email address
Scenario (Given)	Given an account already exists with email abc@gmail.com
Action (When)	When I enter abc@gmail.com during registration And I submit the registration form
Expected (Then)	Then the registration is rejected And the message "Email address is already registered." is displayed.
Result (Pass/Fail)	Pass

User Story ID	US-01
Acceptance Criteria	Email format validation
Scenario (Given)	Given I am on the Job Seeker Registration page
Action (When)	When I enter "<email>" And I complete all other required fields correctly And I click the Register button

Expected (Then)	Then registration is rejected And the message "Please enter a valid email address." is displayed.
Example	Email: abc abcm@gmail.com abc@ @gmail.com abc@gmail abc@@gmail.com
Result (Pass/Fail)	Pass

User Story ID	US-01														
Acceptance Criteria	Password Constraint														
Scenario (Given)	Given I am on the Job Seeker Registration page														
Action (When)	When I enter "<password>" And all other information is valid And I click Register														
Expected (Then)	Then registration is rejected And the message "Password must contain at least 8 characters, including uppercase, lowercase, number and special character." is displayed.														
Example	<table border="1"> <thead> <tr> <th>Password</th><th>Reason</th></tr> </thead> <tbody> <tr> <td>abc123</td><td>Too short</td></tr> <tr> <td>abcdefgh</td><td>No uppercase, number or symbol</td></tr> <tr> <td>ABCDEFGH</td><td>No lowercase, number or symbol</td></tr> <tr> <td>Password</td><td>No number or symbol</td></tr> <tr> <td>Password1</td><td>No special character</td></tr> <tr> <td>password@</td><td>No uppercase or number</td></tr> </tbody> </table>	Password	Reason	abc123	Too short	abcdefgh	No uppercase, number or symbol	ABCDEFGH	No lowercase, number or symbol	Password	No number or symbol	Password1	No special character	password@	No uppercase or number
Password	Reason														
abc123	Too short														
abcdefgh	No uppercase, number or symbol														
ABCDEFGH	No lowercase, number or symbol														
Password	No number or symbol														
Password1	No special character														
password@	No uppercase or number														
Result (Pass/Fail)	Pass														

User Story ID	US-01
Acceptance Criteria	Password confirmation
Scenario (Given)	Given I am on the registration page
Action (When)	When Password is Password123! And Confirm Password is Password123
Expected (Then)	Then registration is rejected And the message " Passwords do not match. " is displayed.
Result (Pass/Fail)	Pass

User Story ID	US-01										
Acceptance Criteria	Required fields cannot be empty										
Scenario (Given)	Given I am on the Job Seeker Registration page										
Action (When)	When I leave the "<field_name>" field empty And I fill all other required fields correctly And I click the Register button										
Expected (Then)	Then I should see the error message										
Example	<table border="1"> <thead> <tr> <th>field_name</th><th>error_message</th></tr> </thead> <tbody> <tr> <td>Username</td><td>Username is required.</td></tr> <tr> <td>Email Address</td><td>Email address is required.</td></tr> <tr> <td>Password</td><td>Password is required.</td></tr> <tr> <td>Confirm Password</td><td>Please confirm your password.</td></tr> </tbody> </table>	field_name	error_message	Username	Username is required.	Email Address	Email address is required.	Password	Password is required.	Confirm Password	Please confirm your password.
field_name	error_message										
Username	Username is required.										
Email Address	Email address is required.										
Password	Password is required.										
Confirm Password	Please confirm your password.										
Result (Pass/Fail)	Pass										

User Story ID	US-03
Acceptance Criteria	Successful employer registration
Scenario (Given)	Given I am on the Employer Registration page
Action (When)	When I enter valid company information

	And click Register
Expected (Then)	Then a company account is created And a success message is displayed And I am redirected to the Login page.
Result (Pass/Fail)	Pass

User Story ID	US-03
Acceptance Criteria	Duplicate email address
Scenario (Given)	Given an account already exists with email abc@gmail.com
Action (When)	When I enter abc@gmail.com during registration And I submit the registration form
Expected (Then)	Then the registration is rejected And the message " Email address is already registered. " is displayed.
Result (Pass/Fail)	Pass

User Story ID	US-03
Acceptance Criteria	Email format validation
Scenario (Given)	Given I am on the Job Seeker Registration page
Action (When)	When I enter "<email>" And I complete all other required fields correctly And I click the Register button
Expected (Then)	Then registration is rejected And the message " Please enter a valid email address. " is displayed.
Example	Email: abc abcm@gmail.com abc@ @gmail.com abc@gmail abc@@gmail.com

Result (Pass/Fail)	Pass
---------------------------	------

User Story ID	US-03														
Acceptance Criteria	Password Constraint														
Scenario (Given)	Given I am on the Job Seeker Registration page														
Action (When)	When I enter "<password>" And all other information is valid And I click Register														
Expected (Then)	Then registration is rejected And the message " Password must contain at least 8 characters, including uppercase, lowercase, number and special character. " is displayed.														
Example	<table border="1"> <thead> <tr> <th>Password</th><th>Reason</th></tr> </thead> <tbody> <tr> <td>abc123</td><td>Too short</td></tr> <tr> <td>abcdefgh</td><td>No uppercase, number or symbol</td></tr> <tr> <td>ABCDEFGH</td><td>No lowercase, number or symbol</td></tr> <tr> <td>Password</td><td>No number or symbol</td></tr> <tr> <td>Password1</td><td>No special character</td></tr> <tr> <td>password@</td><td>No uppercase or number</td></tr> </tbody> </table>	Password	Reason	abc123	Too short	abcdefgh	No uppercase, number or symbol	ABCDEFGH	No lowercase, number or symbol	Password	No number or symbol	Password1	No special character	password@	No uppercase or number
Password	Reason														
abc123	Too short														
abcdefgh	No uppercase, number or symbol														
ABCDEFGH	No lowercase, number or symbol														
Password	No number or symbol														
Password1	No special character														
password@	No uppercase or number														
Result (Pass/Fail)	Pass														

User Story ID	US-03
Acceptance Criteria	Password confirmation
Scenario (Given)	Given I am on the registration page
Action (When)	When Password is Password123! And Confirm Password is Password123
Expected (Then)	Then registration is rejected

	And the message " Passwords do not match. " is displayed.
Result (Pass/Fail)	Pass

User Story ID	US-03										
Acceptance Criteria	Required fields cannot be empty										
Scenario (Given)	Given I am on the Job Seeker Registration page										
Action (When)	When I leave the "<field_name>" field empty And I fill all other required fields correctly And I click the Register button										
Expected (Then)	Then I should see the error message										
Example	<table border="1"> <thead> <tr> <th>field_name</th><th>error_message</th></tr> </thead> <tbody> <tr> <td>Company Name</td><td>Company Name is required.</td></tr> <tr> <td>Company Email</td><td>Company Email is required.</td></tr> <tr> <td>Password</td><td>Password is required.</td></tr> <tr> <td>Confirm Password</td><td>Please confirm your password.</td></tr> </tbody> </table>	field_name	error_message	Company Name	Company Name is required.	Company Email	Company Email is required.	Password	Password is required.	Confirm Password	Please confirm your password.
field_name	error_message										
Company Name	Company Name is required.										
Company Email	Company Email is required.										
Password	Password is required.										
Confirm Password	Please confirm your password.										
Result (Pass/Fail)	Pass										

User Story ID	US-05
Acceptance Criteria	Successful login
Scenario (Given)	Given I have a registered and active account
Action (When)	When I enter the correct email address and password And I click the Login button
Expected (Then)	Then I am successfully logged in And I am redirected to my account dashboard
Result (Pass/Fail)	Pass

User Story ID	US-05
Acceptance Criteria	Required login fields

Scenario (Given)	Given I am on the Login page And I fill the other required field with valid information							
Action (When)	When I leave the "<field_name>" field blank And I click the Login button							
Expected (Then)	Then I should see the error message "<error_message>"							
Example	<table><tr><th>field_name</th><th>error_message</th></tr><tr><td>Email</td><td>Email is required.</td></tr><tr><td>Password</td><td>Password is required.</td></tr></table>		field_name	error_message	Email	Email is required.	Password	Password is required.
	field_name	error_message						
	Email	Email is required.						
Password	Password is required.							
Result (Pass/Fail)	Pass							

User Story ID	US-05
Acceptance Criteria	Invalid email format
Scenario (Given)	Given I am on the Login page
Action (When)	When I enter "<email>" as my email address And I enter a valid password And I click the Login button
Expected (Then)	Then login is rejected And I should see the error message "Please enter a valid email address."
Example	Email: abc abc@gmail abcm@gmail.com @gmail.com abc@@gmail.com
Result (Pass/Fail)	Pass

User Story ID	US-05
Acceptance Criteria	Invalid login credentials
Scenario (Given)	Given I am on the Login page

Action (When)	When I enter Email: "<email>" And enter Password: "<password>" And I click the Login button		
Expected (Then)	Then login is rejected And I should see the error message "Invalid email or password."		
Example			
	email	password	Description
	wrong@gmail.com	Password123!	Account does not exist
	user@gmail.com	Wrong123!	Correct email, wrong password
	wrong@gmail.com	Wrong123!	Incorrect email and password
Result (Pass/Fail)	Pass		

User Story ID	US-05
Acceptance Criteria	Inactive account
Scenario (Given)	Given I have a registered account that has not been activated
Action (When)	When I enter the correct email address and password And I click the Login button
Expected (Then)	Then login is rejected And I should see the error message "Your account is inactive."
Result (Pass/Fail)	Pass

User Story ID	US-05
Acceptance Criteria	Redirect according to account type
Scenario (Given)	Given I have a registered and active "<role>" account
Action (When)	When I log in successfully
Expected (Then)	Then I should be redirected to the "<dashboard>" dashboard
Example	

	role	dashboard
	Job Seeker	Job Seeker Dashboard
	Employer	Employer Dashboard
Result (Pass/Fail)	Pass	

No need, consider as a must but no in sprint 1

User Story ID	US-06
Acceptance Criteria	Successful logout
Scenario (Given)	Given a user is logged in on their account and on any page of the website
Action (When)	When they click the "Logout" button
Expected (Then)	Then their session ends and they are redirected to the login page
Result (Pass/Fail)	

1.4 Sprint Review

Summarise what was demonstrated to the Product Owner (tutor) and any feedback received.

Stories completed:

US-01 – Job seeker registration

US-03 – Employer registration

US-05 – User login

Stories not completed (carried over):

US-06 – User logout

Product Owner feedback:

- Add a Confirm Password field during user registration to reduce password entry errors.
- Improve registration validation by checking the email format before allowing account creation.
- Enforce stronger password requirements, such as minimum length and a combination of uppercase letters, lowercase letters, numbers, and special characters.
- Improve login validation by handling all invalid login scenarios, including blank email, blank password, incorrect email, incorrect password, non-existent account, and inactive account.
- Ensure clear and user-friendly validation messages are displayed for each invalid input.
- Continue following the planned sprint backlog and maintain consistent coding standards for future sprints.

1.5 Sprint Retrospective

What went well	What could be improved
The team successfully completed the Sprint 1 goal by implementing user registration, login, and logout functionalities for both job seekers and employers.	Registration validation should be improved by adding a Confirm Password field to reduce password entry errors.
Team members collaborated effectively by dividing the authentication features among themselves according to the sprint backlog.	Input validation should be more comprehensive, including email format validation, password complexity requirements, duplicate email detection, and required field validation.
Basic authentication functions were integrated successfully, allowing users to create accounts, log in, and log out.	Login validation should cover more scenarios such as blank fields, invalid credentials, non-existent accounts, and inactive accounts.
Acceptance testing helped identify several validation issues before the sprint review.	Acceptance tests should be written in a more complete and structured BDD format using Scenario Outline and Examples where appropriate.

1.6 Action items for next sprint

- Add a Confirm Password field to both the Job Seeker and Employer registration forms.
- Implement stronger input validation, including email format validation, password complexity requirements, duplicate email checking, and required field validation.
- Improve login validation to handle invalid credentials, inactive accounts, and all required field validation scenarios.
- Update the acceptance tests based on the Product Owner's feedback to improve test coverage.
- Perform additional unit testing and integration testing before the next sprint review.
- Begin implementing Sprint 2 user stories according to the prioritized sprint backlog.
- Conduct peer code reviews before merging completed features into the main branch.

Sprint 2

2.1 Sprint Goal

State one clear, measurable goal for this sprint.

Sprint Goal: By the end of this sprint,

2.2 Sprint Backlog

Selected user stories broken into tasks, with story points and status.

Story ID	Task breakdown	Assignee	Pts	Status
US-02	Design and create the job seeker profile page	Chan Jing Xing	3	To Do
	Design and create the edit profile form			To Do
	Create backend functionality to retrieve existing profile information			To Do
	Create backend functionality to update profile details in the database			To Do
	Implement resume upload and replacement functionality			To Do
	Validate profile inputs and uploaded resume file (format, size, required fields)			To Do
	Display success and error messages after updating the profile			To Do
US-08	Design and create the job posting page	Yap Wing Hong	5	To Do
	Design and create the job posting form (title, description, requirements, salary, location, etc.)			To Do
	Create backend functionality to save new job listings tied to the logged in employer account id into the database			To Do
	Validate all required job posting fields			To Do
	Display success and error messages after posting a job			To Do
	Ensure only authenticated employers can create job listings			To Do

US-12	Design and create the Job Details page layout	Ng Jing Xuan	2	To Do
	Create backend functionality to retrieve the selected job listing from the database using the Job ID			To Do
	Display complete job information including job title, description, requirements, salary, location, employment type, company name, and posted date			To Do
	Display company profile information associated with the job listing			To Do
	Handle invalid, closed, or deleted job listings by displaying an appropriate error message			To Do
	Display the Apply button only for logged-in job seekers and hide or disable it for employers or guests			To Do
	Provide navigation back to the search results page			To Do
US-16	Design and create the applicant management page	Chan Jing Xing	3	To Do
	Create backend functionality to retrieve applicants for each job listing			To Do
	Display applicant information (name, contact details, resume, application date)			To Do
	Allow employers to view or download submitted resumes			To Do
	Ensure employers can only view applicants for their own job listings			To Do
	Display appropriate messages if there are no applicants			To Do
US-18	Design and create the Job Search page	Ng Jing Xuan	5	To Do
	Design and create the search			To Do

	input field and Search button			
	Create backend functionality to search job listings by job title or company name			To Do
	Retrieve only active job listings from the database			To Do
	Display matching job listings in a structured list with job title, company name, location, salary, and posted date			To Do
	Support case-insensitive search, partial keyword, leading and trailing spaces ignorance, special characters ignorance matching			To Do
	Handle searches with no matching results by displaying a "No results found" message			To Do
	Validate empty search input and display all active listings or prompt the user to enter a keyword			To Do
	Ensure search results can be opened through the Job Details page			To Do
US-13	Add an "Apply" button on the job details page	Yap Wing Hong	5	To Do
	Create backend functionality to retrieve the user's saved resume			To Do
	Create backend functionality to submit a job application			To Do
	Save the application record in the database			To Do
	Prevent duplicate applications for the same job			To Do
	Display confirmation, success, and error messages			To Do
	Notify the employer of the new application (optional)			To Do

2.3 Story Acceptance Tests

Add one block per user story undertaken in this sprint. Duplicate as needed.

→ profile is just resume?

User Story ID	US-02
Acceptance Criteria	Successful ^{user} profile update
Scenario (Given)	Given a logged-in job seeker is on their profile edit page
Action (When)	When they ^{with valid information} update their details and save
Expected (Then)	Then the changes are saved and reflected immediately on their profile
Result (Pass/Fail)	Pass

User Story ID	US-02	other fields ??
Acceptance Criteria	Successful resume upload	
Scenario (Given)	Given a logged-in job seeker is on their profile edit page	
Action (When)	When they upload a resume in an accepted format (PDF/DOCX) under the size limit	
Expected (Then)	Then the resume is saved and linked to their profile	
Result (Pass/Fail)	Pass	

User Story ID	US-02
Acceptance Criteria	Invalid file type upload
Scenario (Given)	Given a logged-in job seeker is on their profile edit page
Action (When)	When they attempt to upload a resume in an unsupported file format
Expected (Then)	Then the upload is rejected, and an error message is shown
Result (Pass/Fail)	Pass

User Story ID	US-02
Acceptance Criteria	Oversized file upload
Scenario (Given)	Given a logged-in job seeker is on their profile edit page
Action (When)	When they attempt to upload a resume file exceeding the size limit

Expected (Then)	Then the upload is rejected, and an error message is shown
Result (Pass/Fail)	Pass

User Story ID	US-08
Acceptance Criteria	Successful job posting
Scenario (Given)	Given a logged-in employer is on the "post job" page
Action (When)	When they fill in title, description, requirements, and salary, then submit <i>with valid information</i>
Expected (Then)	Then the listing is created and the job listing page is displayed
Result (Pass/Fail)	Pass

User Story ID	US-08
Acceptance Criteria	Missing required field
Scenario (Given)	Given a logged-in employer is on the "post job" page
Action (When)	When they submit the form with a required field (e.g., title) left blank
Expected (Then)	Then the form does not submit and an error highlights the missing field
Result (Pass/Fail)	Pass

why didn't follow the sample?

User Story ID	US-08
Acceptance Criteria	Listing correctly linked to company
Scenario (Given)	Given a logged-in employer successfully posts a job listing
Action (When)	When a job seeker views that listing
Expected (Then)	Then the listing displays the correct associated company name/profile
Result (Pass/Fail)	Pass

User Story ID	US-08
Acceptance Criteria	Non logged in employer access attempt
Scenario (Given)	Given an employer user is not logged in to their account

Action (When)	When they attempt to access the “post job” page or try to submit a job listing
Expected (Then)	Then the job listing is not posted and they are denied access and shown an error message, and redirected to login page.
Result (Pass/Fail)	Pass

→ This page shouldn't be visible for guest

User Story ID	US-08
Acceptance Criteria	Invalid data type submitted
Scenario (Given)	Given a logged-in employer is on the “post job” page
Action (When)	When they enter a non-numeric or a negative number value in the salary field
Expected (Then)	Then the form rejects the input and shows a validation error message
Result (Pass/Fail)	Pass

0 ?

User Story ID	US-12
Acceptance Criteria	View an active job listing
Scenario (Given)	Given I am a job seeker viewing the search results page
Action (When)	When I click on an active job listing
Expected (Then)	Then the complete job information is displayed And the job title, company name, description, requirements, salary, location, employment type and posted date are shown
Result (Pass/Fail)	Pass

User Story ID	US-12
Acceptance Criteria	Invalid or unavailable job listing
Scenario (Given)	Given the selected job listing is "<status>"
Action (When)	When I attempt to access the job details page
Expected (Then)	Then the job details are not displayed And the message "<message>" is displayed
Example	

Given the selected job listing has a status of <status>

	status	message
	Deleted	This job listing no longer exists.
	Closed	This job listing is no longer available.
	Invalid Job ID	Job listing not found. <i>→ when this will be displayed?</i>
Result (Pass/Fail)	Pass	

User Story ID	US-12
Acceptance Criteria	Display company information
Scenario (Given)	Given I am viewing a valid job listing
Action (When)	When the page loads successfully
Expected (Then)	Then the associated company information is displayed And the company name is shown And the company profile can be viewed
Result (Pass/Fail)	Pass

User Story ID	US-12								
Acceptance Criteria	Apply button visibility								
Scenario (Given)	Given I access a valid job listing								
Action (When)	When I am logged in as "<user_type>"								
Expected (Then)	Then "<button_status>" is displayed								
Example	<table border="1"> <thead> <tr> <th>user_type</th><th>button_status</th></tr> </thead> <tbody> <tr> <td>Job Seeker</td><td>Apply button <i>is displayed</i></td></tr> <tr> <td>Employer</td><td>Apply button is hidden</td></tr> <tr> <td>Guest</td><td>Login to apply message <i>displayed</i></td></tr> </tbody> </table>	user_type	button_status	Job Seeker	Apply button <i>is displayed</i>	Employer	Apply button is hidden	Guest	Login to apply message <i>displayed</i>
user_type	button_status								
Job Seeker	Apply button <i>is displayed</i>								
Employer	Apply button is hidden								
Guest	Login to apply message <i>displayed</i>								
Result (Pass/Fail)	Pass								

User Story ID	US-12
Acceptance Criteria	Return to search results
Scenario (Given)	Given I am viewing a job listing
Action (When)	When I click the Back button
Expected (Then)	Then I am redirected to the previous search results page And my previous search results remain displayed
Result (Pass/Fail)	Pass

User Story ID	US-16	<i>THIS is just testy navigation</i>
Acceptance Criteria	Directed to applicant's profile	
Scenario (Given)	Given I am viewing a job listing	
Action (When)	When I click the View Applicants button	
Expected (Then)	Then I am redirected to the applicants who applied to the job listing	
Result (Pass/Fail)	Pass	<i>→ system display applicant name, contact, resume</i>

User Story ID	US-16
Acceptance Criteria	view job applicant details
Scenario (Given)	Given I am viewing applicants in the job listing
Action (When)	When I click the View Applicants button
Expected (Then)	Then I am redirected to the applicant's profile
Result (Pass/Fail)	Pass

User Story ID	US-18
Acceptance Criteria	Search by keyword returns matching job listings
Scenario (Given)	Given I am on the Job Search page

Action (When)	When I enter "<keyword>" in the search field And I click the Search button																																			
Expected (Then)	Then all matching job listings are displayed																																			
Example	<table><tr><th>Existing Job Title / Company Name</th><th>Keyword</th><th>Description</th></tr><tr><td>Software Engineer</td><td>Software Engineer</td><td>Complete keyword</td></tr><tr><td>Software Engineer</td><td>Engineer</td><td>Exact keyword</td></tr><tr><td>Software Engineer</td><td>Engin</td><td>Partial keyword</td></tr><tr><td>Software Engineer</td><td>engineer</td><td>Lowercase search</td></tr><tr><td>Software Engineer</td><td>ENGINEER</td><td>Uppercase search</td></tr><tr><td>Software Engineer</td><td>Engineer</td><td>Mixed case search</td></tr><tr><td>Software Engineer</td><td>Engineer</td><td>Leading/trailing spaces are ignored</td></tr><tr><td>Marketing Executive</td><td>Market</td><td>Partial keyword</td></tr><tr><td>Accountant</td><td>Account</td><td>Partial keyword</td></tr><tr><td>Google</td><td>Goog</td><td>Partial keyword</td></tr></table>			Existing Job Title / Company Name	Keyword	Description	Software Engineer	Software Engineer	Complete keyword	Software Engineer	Engineer	Exact keyword	Software Engineer	Engin	Partial keyword	Software Engineer	engineer	Lowercase search	Software Engineer	ENGINEER	Uppercase search	Software Engineer	Engineer	Mixed case search	Software Engineer	Engineer	Leading/trailing spaces are ignored	Marketing Executive	Market	Partial keyword	Accountant	Account	Partial keyword	Google	Goog	Partial keyword
	Existing Job Title / Company Name	Keyword	Description																																	
	Software Engineer	Software Engineer	Complete keyword																																	
	Software Engineer	Engineer	Exact keyword																																	
	Software Engineer	Engin	Partial keyword																																	
	Software Engineer	engineer	Lowercase search																																	
	Software Engineer	ENGINEER	Uppercase search																																	
	Software Engineer	Engineer	Mixed case search																																	
	Software Engineer	Engineer	Leading/trailing spaces are ignored																																	
	Marketing Executive	Market	Partial keyword																																	
	Accountant	Account	Partial keyword																																	
	Google	Goog	Partial keyword																																	
Result (Pass/Fail)	Pass																																			

User Story ID	US-18		
Acceptance Criteria	Special characters in search keyword		
Scenario (Given)	Given I am on the Job Search page		
Action (When)	When I enter "<keyword>" in the search field And I click the Search button		
Expected (Then)	Then the system ignores unnecessary special characters And searches using "<processed_keyword>" And "<expected_result>" is displayed		
Example	keyword	processed_keyword	expected_result
	@Engineer	Engineer	Matching job

	#Google	Google	listings are displayed Matching job listings are displayed
	%Developer!	Developer	Matching job listings are displayed
	@@@	(empty)	Message "No matching jobs found." is displayed
	###	(empty)	Message "No matching jobs found." is displayed
	!!!	(empty)	Message "No matching jobs found." is displayed
Result (Pass/Fail)		Pass	

User Story ID	US-18
Acceptance Criteria	Search with no matching results
Scenario (Given)	Given I am on the Job Search page
Action (When)	When I enter a keyword that matches no job listings in the search field And I click the Search button
Expected (Then)	Then the message "No matching jobs found." is displayed
Result (Pass/Fail)	Pass

User Story ID	US-18
Acceptance Criteria	Empty search keyword
Scenario (Given)	Given I am on the Job Search page
Action (When)	When I leave the search field empty And I click the Search button
Expected (Then)	Then all active job listings are displayed

Result (Pass/Fail)	Pass
---------------------------	------

User Story ID	US-18
Acceptance Criteria	Search result navigation
Scenario (Given)	Given matching job listings are displayed
Action (When)	When I click a job listing
Expected (Then)	Then I am redirected to the Job Details page And the selected job information such as job title, description, requirements, salary, location, employment type, company name, and posted date is displayed correctly
Result (Pass/Fail)	Pass

User Story ID	US-13
Acceptance Criteria	Successful application
Scenario (Given)	Given a logged-in job seeker with a saved resume is viewing a job listing's details
Action (When)	When they click "Apply"
Expected (Then)	Then the application is submitted and appears in their "My Applications" list
Result (Pass/Fail)	Pass

User Story ID	US-13
Acceptance Criteria	Duplicate application prevention
Scenario (Given)	Given a job seeker has already applied to a specific listing
Action (When)	When they attempt to apply to the same listing again
Expected (Then)	Then the system prevents a duplicate application and shows a message
Result (Pass/Fail)	Pass

User Story ID	US-13
Acceptance Criteria	Applying without a saved resume
Scenario (Given)	Given a logged-in job seeker has not yet uploaded a resume, and redirected to upload a resume
Action (When)	When they attempt to click "Apply" on a listing
Expected (Then)	Then they are prompted to upload a resume before applying
Result (Pass/Fail)	Pass

User Story ID	US-13
Acceptance Criteria	Applying to a closed listing
Scenario (Given)	Given a job listing has since been closed
Action (When)	When a job seeker attempts to apply to it
Expected (Then)	Then the "Apply" action is unavailable or blocked, with a message indicating the listing is closed
Result (Pass/Fail)	Pass

User Story ID	US-13
Acceptance Criteria	Applying while not logged in as job seeker
Scenario (Given)	Given a job seeker user is not logged in
Action (When)	When the non logged in job seeker attempt to click "Apply" on a listing
Expected (Then)	Then they are redirected to login, and no application is submitted
Result (Pass/Fail)	Pass

User Story ID	US-13
Acceptance Criteria	Employer job listing status updated
Scenario (Given)	Given a job seeker successfully applies to a job listing
Action (When)	When the employer view the job listing
Expected (Then)	Then the job seeker's application details are shown
Result (Pass/Fail)	Pass

2.4 Sprint Review

Summarise what was demonstrated to the Product Owner (tutor) and any feedback received.

Stories completed: _____

Stories not completed (carried over): _____

Product Owner feedback: _____

2.5 Sprint Retrospective

What went well	What could be improved

2.6 Action items for next sprint

- _____
- _____

Sprint 3

3.1 Sprint Goal

State one clear, measurable goal for this sprint.

Sprint Goal: _____

3.2 Sprint Backlog

Selected user stories broken into tasks, with story points and status.

Story ID	Task breakdown	Assignee	Pts	Status
				To Do
				To Do
				To Do
				To Do

3.3 Story Acceptance Tests

Add one block per user story undertaken in this sprint. Duplicate as needed.

User Story ID	US-__
Acceptance Criteria	
Scenario (Given)	Given ...
Action (When)	When ...
Expected (Then)	Then ...
Result (Pass/Fail)

5.3 Nightly automated builds

Insert a screenshot of your CI pipeline (e.g. GitHub Actions) showing successful automated builds.

[Paste screenshot here]

6 Testing Documentation

Evidence of automated unit testing for at least one user story by Sprint 3.

6.1 User story tested

Story ID & description: _____

6.2 Framework used

e.g. JUnit / pytest / Jest: _____

6.3 Test code & results

Paste the test code and a screenshot of the passing test run integrated into the CI pipeline.

[Paste test code / screenshot here]

7 AI Usage Declaration

This assignment is classified YELLOW (Limited AI) under TAR UMT's Red–Yellow–Green Framework. AI tools may be used only for permitted supporting purposes (e.g. language refinement, concept clarification, debugging assistance, formatting) and must not generate core deliverables such as user stories, sprint planning artifacts, acceptance tests, retrospective analysis, or substantive source code. All AI use must be declared below. Undeclared use is treated as academic dishonesty.

Declaration (tick one):

No AI tools were used in the preparation of this portfolio.

AI tools were used as declared in the table below.

AI Tool	Task / Section it was used for	How the output was verified / edited	Member(s) responsible

We confirm that the work submitted in this portfolio is our own, that any AI use has been declared above, and that we have verified the accuracy of all content. We accept full responsibility for the final submission.
